

# KLEOSAERO

## International Flight Planning Specialists

We offer supercharged solutions for your global aircraft movement needs.

-  *International Flight Planning*
-  *Overflight and Landing Permits*
-  *Dispatch and Flight Watch*
-  *Crew Control and Communication*
-  *Ground Handling*

Kleos processes are designed to remove the complexity of your aircraft operation. We live and breathe aircraft movement and flight operations, making them as easy and smooth as possible for your organisation.

## International Flight Planning

We offer our expertise for **all flight planning requirements**, no matter how complex. From accurate and concise flight planning data, optimising your routes and fuel burns, evaluating weather, performance, weight and balance constraints and more, Kleos can help.

## Overflight and Landing Permits

We can arrange **all necessary permits** for your operations. Time constrained permits often need renewing after operational or technical delays and **we monitor this constantly** during the course of pre-flight planning and during the course of your live trip.

## Dispatch and Flight Watch

Securing an on-time dispatch is a speciality for our team. Once we're airborne, you will be able to follow all movements in real time with our **live radar feed, flight watch service** which is a standard part of our service.

## Crew Control and Communication

Sometimes our clients will provide crew and control them internally, whereas others require us to provide all crew, and arrange all associated logistics. We are used to different levels of involvement and **can fluidly adjust** as you require.

## Ground Handling

We are **totally independent of any group company** meaning we can select from various ground handling providers to **secure the best value**. We can also assist with all **customs arrangements and APIS or GAR submission**, as required.

## Transparent Quoting and Costings

**Business transparency** is a core value of Kleos. We have been around aviation long enough to know that many unscrupulous players take advantage of a complex industry. We have **no hidden costs** and our quoting and invoicing accurately and clearly reflects every detail of your operation.

We offer 24/7 availability and fully tailored solutions for all aircraft types and trip complexities. For more information and to discuss your exact requirements, contact our expert team directly.
